Summary

I am an Application Developer at US Foods. I was able to convert my internship as a Web Application Developer intern into a full-time position. My eagerness to learn new skills and technology have helped me throughout college and landed me a job. I look forward to the future on transitioning my skills into a Software Engineering role. As my side hobby I like to make things with my 3D printer, currently working on an Iron Man Mark 85 helmet.

Work Experience

US Foods   Tempe, AZ
Application Developer | Applications Solutions   May 2019 – Current
- Increased JUnit test cases from 65% to 75% test code coverage for API's.
